MACHINE REINSTALLATION SERVICES

Your machine serves you well and has been a critical part of your production line. But what happens when you need to move that machine either to a different part of the building or a different country? MTI is here to help.

A NEW HOME FOR YOUR MACHINERY

A change of scenery can be good - even for a machine! While you may have imagined your machinery would stay in one spot for its entire life, sometimes events such as facility relocations, or even a redesign of your production floor, may make it necessary to move your capital equipment.

Though our specialty is designing and building friction welding machines, our 90+ years of experience in manufacturing settings make us the ideal candidate for safely, efficiently and strategically coordinating the move of your equipment.

Our moving services reach beyond MTI-built machines. If it's on your shop floor, regardless of which company built it, you can rest assured MTI has the experience and expertise to ensure your machinery works just as well in its new location as it did in its old location.

Let MTI take the stress out of your next equipment move!

WHY MTI IS QUALIFIED TO MOVE YOUR MACHINE

**1,000+ MACHINES
INSTALLED**

**300+ COMBINED YEARS
OF FRICTION WELDING EXPERIENCE**

**GLOBAL
LOCATIONS**

OUR FEATURED REINSTALLATION STORIES

**LF35-75
Linear Friction Welder**

One of the largest linear friction welders in the world, the LF35-75 was designed and built at MTI's global headquarters in South Bend and was moved to its new home in Detroit.

**Fully Automated
Axle Tube Machine**

Designed to complete an entire weld cycle without human intervention, this automotive machine was equipped with two robots and was re-installed in its new facility.

**Two-Story-Tall
Jet Engine Machine**

Built and engineered for a leading Aerospace provider, this large-capacity linear friction welding machine weighs 200 tons and was transported on a flatbed to the East Coast.

**300-Ton Tri-Mode
Rotary Friction Welder**

Originally built at our global headquarters in South Bend, this massive machine has made two moves across Europe, with MTI overseeing the reinstallation both times.

SIZING UP YOUR MOVE

LARGE TO SMALL, WE MOVE THEM ALL

WE'RE HERE FOR EACH STEP

- MACHINE TEAR-DOWN
- PACKING MACHINE FOR SHIPMENT
- MACHINE RIGGING
- SHIPPING & REINSTALLATION
